Seldon Solutions presents itself as an AI technology company

Barcelona, 11 November 2026. The new seldonsolutions.es leads with one line: Seldon Solutions is an AI technology company.

The site sets out what the company makes: Kalimba, the restaurant platform, in private beta; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.

It also shows the company as the legal entity it is: Seldon Solutions S.L., with its tax number and its registered office in Barcelona. A new press page gathers the company's milestones, each release dated by the milestone it reports.

About Seldon Solutions

Seldon Solutions S.L. is an AI technology company based in Barcelona. It builds engines that answer, act and finish the job, and it runs them itself. Its products are Kalimba, the restaurant platform; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.
