Cambialeón has a new site, with Léo, its AI assistant, in four languages

Barcelona, 7 November 2026. Léo is the new face of cambialeon.com: the AI assistant who answers customers in the chat, on a site with a new design.

The site is now in Spanish, Catalan, English and Portuguese, and has a page of its own for energy suppliers.

Cambialeón reads a customer's electricity or gas bill in a WhatsApp chat, shows the offer and hands the switch to the supplier, which signs and makes the change.

About Seldon Solutions

Seldon Solutions S.L. is an AI technology company based in Barcelona. It builds engines that answer, act and finish the job, and it runs them itself. Its products are Kalimba, the restaurant platform; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.
