Conomium opens at conomium.com, with the same engines built for other businesses

Barcelona, 9 November 2026. Seldon Solutions opens conomium.com, the site of Conomium: the same engines as the company's own products, built for other businesses.

The site says it in one line: "Conomium makes your bot an engine." Visitors can talk to the site's own assistant in its chat.

On 10 November, the site took on Conomium's new mark, Through.

About Seldon Solutions

Seldon Solutions S.L. is an AI technology company based in Barcelona. It builds engines that answer, act and finish the job, and it runs them itself. Its products are Kalimba, the restaurant platform; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.
