QuiqSim speaks eight languages and adds plans for a region or the whole world

Barcelona, 3 September 2026. Eight languages: QuiqSim now answers travellers in English, Spanish, French, Portuguese, German, Dutch, Italian and Turkish. The language menu on quiqsim.com offers the same eight.

A traveller can also choose a plan for one country, for a whole region or for the whole world, in the chat.

The day before, quiqsim.com was rebuilt around guidance for each destination and step by step help in the traveller's language.

QuiqSim is the company's travel eSIM service: the eSIM is chosen and installed in one WhatsApp chat and paid through a secure link.

About Seldon Solutions

Seldon Solutions S.L. is an AI technology company based in Barcelona. It builds engines that answer, act and finish the job, and it runs them itself. Its products are Kalimba, the restaurant platform; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.
