QuiqSim brings a traveller's eSIMs, install links and top ups into the chat

Barcelona, 16 August 2026. Travellers who use QuiqSim can now see all their eSIMs in the WhatsApp chat where they arranged them.

From My eSIMs, in the same chat, a traveller can also ask for a fresh install link or top up an eSIM.

QuiqSim is the company's travel eSIM service: a traveller tells the chat where they are going, pays through a secure link and installs the eSIM from the same WhatsApp chat.

About Seldon Solutions

Seldon Solutions S.L. is an AI technology company based in Barcelona. It builds engines that answer, act and finish the job, and it runs them itself. Its products are Kalimba, the restaurant platform; QuiqSim, for travel eSIMs; Cambialeón, for electricity and gas, with SwitchAPI for energy companies; and Conomium, the same engines built for other businesses.
